

Literacy

We will be learning to:

- write our own sentences using our phonic knowledge and our writing targets to support us
- consistently form our letters in the right way and place them correctly on the lines, thinking about letters that are tall, letters that sit on the line and letters that hang below the line (see @home page)
- use the sounds and digraphs (e.g sh, ch, th) we know to make, read and write words
- read with increasing confidence common words that we have learned
- identify main events of a story, thinking about what happens in the beginning, middle and end
- listen and respond appropriately to others
- answer questions about a text to show our understanding

At home:

- read often and encourage your child to find words or sounds that they know in the text
- support your child with their literacy homework
- listen to your child reading the book/words they bring home, encouraging them to point to the words as they read
- recap the common words we have learned and support your child to read them

Numeracy and Mathematics

We will be learning to:

- recognise written numbers up to 100
- count back from 20 and forwards to 100 where possible
- form our numbers correctly
- use a number line/100 square, looking at patterns and identifying missing numbers (see second page)
- count forwards and backwards in tens
- organise objects into equal groups
- order numbers within a given range
- name, identify and classify 2D shapes and 3D objects
- describe 2D shapes and 3D objects using the appropriate vocabulary

At home:

- Encourage children to identify numbers on everyday objects, thinking about what numbers would come before and after
- Look for familiar shapes in the environment and discuss what they know about these shapes
- Use the 100 square on the second page to help your child become more familiar with larger numbers

Health and Wellbeing

This term in PE we will be looking at developing our basic movements: running, jumping, walking and dodging. We will also take part in PE adventures, developing physical literacy and movement skills.

Through our Edenside Learners, Charlie and Emily, we will focus on being respectful to others.

We will be learning about different emotions we may feel and strategies that we can use to help us deal with these.

Inventions

We will be learning about what an inventor is and what they do. We will learn about some famous inventors, what they have created and the impact that it has had on our lives. Using a variety of materials/objects we will design and create our own invention, this will allow us to problem solve and to work with others to come up with a solution.
