

P6 – Curriculum Overview - Block 3

Heart of Scotland

We will spend time in January investigating Scots (past and present) who have made an impact on us and the world around them. We will also celebrate and immerse ourselves in Scots language.

Health & Wellbeing

This term **P.E. lessons** will focus on different types of fitness, basketball skills and other team games.

We will be focussing on growth mindset, food and health and being safe around home and water this term.

Literacy – Reading

In class, time will be given daily for children to read a book of their choice from our extensive class library and online.

To further promote 'Reading is Fun' we will celebrate World Book Day with a week of inspiring fun activities.

In different reading groups we will continue to work on a range of reading skills and strategies to read and understand texts, for example, skimming, scanning, predicting. This term we will especially focus on inference and summarising.

We will use different types of texts to make notes, organise them under suitable headings and use them to better understand the information.

Literacy – Writing

We will continue to investigate more complicated sentence structures by using fronted adverbials, conjunctions and a range of punctuation.

We will start the year by developing our descriptive vocabulary to describe characters, settings and events. We will then go on to use expository writing using our own topic research showing our understanding of finding and organising information. We will use our notes to write an information report, ensuring that our texts are full of useful conjunctions and technical vocabulary.

Literacy – Spelling & Phonics

We will continue with daily spelling lessons which focus on a phoneme, a set of appropriate High Frequency Words or common prefixes, suffixes which can be used to build vocabulary. Our pupils are developing insight into their strengths and challenges for spelling words and are becoming more confident in independently using tools to support themselves when spelling correctly is important.

Literacy – Oracy

P6 are continuing to develop skills in becoming successful talkers & listeners: linguistic, physical, cognitive, social & emotional. Our Scottish focus, with presentations and recitals, will give us lots of opportunities to build on the physical skills we nurtured throughout the musical: projecting voice, using intonation, eye contact, gesture and facial expression. To further show their ability and confidence to present, we will ask you child to present a book in front of the class. The preparation for this will be **homework**. Presentations will be planned in for the first week of March.

Fractions, Decimals and Percentages

Number – Fractions, Decimals and Percentages

We will investigate the everyday contexts in which simple fractions, percentages or decimal fractions are used. We will learn the equivalent forms of simple fractions, decimal fractions and percentages. We will calculate simple fractions of a quantity and use this knowledge to solve problems, for example, find $\frac{1}{3}$ of 60.

Please get in touch if you have any queries, questions or information you feel is important for us to know to support your children best.

You can write a note, call the office and you can also email:

Maths – Time, Properties of Shape, Probability & Chance

We start this block by revisiting time telling by using analogue and digital clocks. We practise to solve real life problems using timetables and calendars.

We will practise identifying and describing 2D and 3D shapes using the correct vocabulary. We will learn the relationship between the radius and the diameter and will use digital technologies to draw a variety of shapes.

We will plan and carry out simple experiments to learn about probability and chance.

Science Week

British Science Week is a ten-day celebration of thousands of events running throughout the whole of the UK with the aim of celebrating science, engineering, technology and maths. During this year's **Science Week**, we will look at **Chemical Reactions**.
